My Films

I have also created a number of my own films where I have been responsible for original conception through to editing and sound design. These films were produced with little to no budget or time but I believe that the final product was a success.

I love working on all aspects of animation from the initial character and concept design, model making, set design, directing and animating to editing and sound design. Although I am interested in all aspects of animation, my passion is in 3-D stop motion animation, working with my hands to create new characters and worlds.
